

Stella Chen

Target : Product Manager

3+ years of experience planning government-scale B2B systems

Taipei, Taiwan +886 980 517 778 yuxiangsu0220@gmail.com Download Resume

Core Competencies

- Product Definition & Planning:** Requirement interviews, PRD writing, user journeys, MVP scoping, and roadmap planning.
- Project Management & Collaboration:** Cross-functional communication (Dev/Design/QA), risk management, and prioritization.
- System & Logic Analysis:** Automation of complex workflows, information architecture (IA), and API communication logic.
- UX Optimization:** UI/UX implementation, usability testing (Maze), and building enterprise design standards.

Skills & Tools

- Design & Prototyping:** Figma (advanced), Xmind (structured thinking), Miro (remote collaboration)
- Docs & Management:** PRD writing, Notion (database organization), ERP systems
- Technical Literacy:** JavaScript, HTML/CSS
- Soft Skills:** Cross-team translation, conflict resolution, regulation-driven logic modeling

Professional Experience

日陸空間資訊股份有限公司

UI/UX Designer

2023.03 – Present

Owned two government-scale B2B products, leading product planning, requirements analysis, and UI design.

- 0→1 delivery & awards:** Led 24 system modules end-to-end; the project team won the 21st Golden Map Awards (Application System Award).
- Requirements & specification:** Joined stakeholder sessions and decomposed abstract needs into PRDs and user stories, achieving 100% on-time delivery.
- Satisfaction & cost optimization:** Improved user satisfaction from 70% to 93% through iterative enhancements; built UI standards and modular design, reducing early-phase communication time by 10–20%.
- Selected Projects:**
 - Municipal Engineering Contract Performance Management System (2021 - 2025)**
 - Background:** An enterprise management system spanning 89 major modules plus a cross-platform mobile app.
 - Role:** Product planning & requirements analysis
 - Contribution:** Unified conflicting requirements across 5+ government agencies into a coherent system logic; produced PRDs and detailed UI specs for 11 functional modules.
 - Outcome:** System stability and usability received 80%+ user satisfaction feedback.
 - GIS-based Urban Infrastructure Management System (2021 - 2025)**
 - Background:** A long-running (5+ years) operations project with complex geo-data and business logic.
 - Role:** Product planning & requirements analysis
 - Contribution:** Simplified complex pipeline workflows and designed intuitive UIs to lower the learning curve for frontline staff; training feedback satisfaction increased from 70% to 93%.
 - Outcome:** Helped the project win the 21st Golden Map Awards (Application System Award).

Career Transition & Professional Development

Professional Development

2021.01 – 2022.12

- UX research & validation:** Conducted user research using affinity mapping, behavior spectrums, and customer journey maps, and analyzed user behavior data with Maze.
- Prototyping & frontend fundamentals:** Built high-fidelity interactive prototypes in Figma and learned JavaScript, HTML/CSS, and API collaboration practices to improve engineering communication.

恩納德生技有限公司

Administrative Coordinator (North Region)

2019.03 – 2020.06

- Process automation:** Built SOPs for new product/service processes from scratch, improving hospital-side certification review efficiency.
- Needs synthesis & client coordination:** Served as a bridge between sales and clients, identifying pain points through guided interviews and optimizing contracts and tender processes.
- Data & supply chain management:** Managed high-value inventory in an ERP system, handled financial reports, and ensured shipping and purchasing accuracy.

International Education Exchange Association (China Office)

Program Officer

2018.07 – 2019.01

- Project planning & execution:** Planned overseas program briefings and employer meetups, managing timelines and execution progress.
